

Biolux Research Announces Health Canada Regulatory Approval for its OsseoPulse™ Bone Regeneration System.

VANCOUVER, B.C., CANADA - May 7, 2008 – Biolux Research Ltd. announced today that it has received approval from Health Canada to market the OsseoPulse™ Bone Regeneration System in Canada. The OsseoPulse™ is classified by Health Canada as a Class II medical device, and received a Medical Device Licence for the system and its components. The licence was applied for in partnership with StarFish Medical of Victoria, BC.

“Issue of the licence from Health Canada is a key milestone in our plan to commercialize the OsseoPulse™ product. It enables marketing and sales of the product directly in Canada, as well as establishes country of origin approval to support export to overseas markets,” states Kevin Strange, President and CEO of Biolux. “We look forward to introducing the OsseoPulse™ to the Canadian market at dental implant and regeneration conferences in the third quarter of this year, and to the Korean market with our distribution partner DIO Implant.”

About Biolux Research

Biolux Research Ltd. is a world leader in the development of light activated bone regeneration systems for dentistry. Biolux focuses on product development, clinical and basic research and is well positioned to release its OsseoPulse™ system to the marketplace in 2008. Its proprietary, patent pending OsseoPulse™ Bone Regeneration System is premised on a vision to transform the practice of implantology and oral surgery in dentistry by accelerating implant integration and bone regeneration in a safe, effective and non-invasive approach. www.bioluxresearch.com

About DIO Implant

DIO Implant is a subsidiary of Dong Seo Inc. (DSI), a KOSDAQ exchange listed company with a market value approximately 160 Million US dollars. DIO implant is one of the best selling implant systems in Korea.
