**BIOLUX RESEARCH ANNOUNCES REGIONAL  
DISTRIBUTION PARTNER FOR MIDDLE EAST AND  
NORTH AFRICA**

---

**VANCOUVER, B.C., CANADA – Feb. 4, 2013** – Biolux Research Ltd. Is very pleased to announce a partnership with MAC International Medical Solutions LLC of Dubai, UAE, for the distribution of the OsseoPulse™ bone regeneration system for use in implantology and dental surgery. The distribution agreement includes the regional territory of the Middle East and North Africa (MENA), and is for a three year term.

MAC and Biolux have worked together to evaluate the market potential for the OsseoPulse™ in this region, including product and clinical evaluation by key opinion leaders in Dubai, and look forward to introducing the product to the larger region. The OsseoPulse™ will be formally launched at the UAE International Dental Conference and Arab Dental Exhibition in Dubai Feb 5 – 7, 2013.

“MAC International is very pleased to add the OsseoPulse™ to our dental product offering, and we believe it will fit perfectly with our team of dedicated sales professionals in the region,” states Dr. Mazen Canon, Director of MAC International. “We believe that the OsseoPulse™ can be an important treatment option for patients with complicated implant surgeries or those who desire earlier loading of implants and final restorations.”

“We are happy to announce this new distribution partnership with MAC for the OsseoPulse™,” states Kevin Strange, President and CEO of Biolux. “The MENA region represents a growth area for implantology, and has shown a very strong interest in new technologies for improving dental implant and surgical outcomes and for reducing treatment timelines. We look forward to working with MAC to present new solutions to the dental market.”

**About MAC International**

MAC is dedicated to providing and selling high tech dental products, including exclusive distribution of Biolase (dental lasers) and Implant Direct Sybron (dental implants). Our core vision is to provide high quality products and education and we have hosted hundred of ICOI-certified courses in the dental fields of implantology, orthodontics, laser dentistry, and microscopic dentistry since 2001.
